

## **Mary's Hour!** **Universal invocation**

**For the protection of humanity.**

Many people without a particular belief are touched by the noble figure of the Mother of humanity. She is the crucible who welcomes any intention of peace.

Thanks to their sensitivity, women easily feel close to her, because she is the very essence of the feminine identity. As for men, many worship her.

Most of the religions, traditions and philosophies concede a place to Mary.

In general, they acknowledge her as a model of the embodiment of unconditional Love.

Everyone is invited to participate in *Mary's Hour*, a universal invocation done every day at noon or at another moment at your convenience, because these troubled times demand an urgent call directed to Mary.

Your signature or your contribution to an action of your choice helps the gathering of this power of contemplation.

Let us forget our differences to be, together with Mary, the artisans of the protection of humanity and the planet.

From the bottom of my heart, thank you for your participation.
